

Hammock chair basic

Caribeña purple CIC14-7

Hammock chair Basic Caribeña purple is made of pure, high-quality cotton. It is from Colombia, where hammocks have always been an essential part of everyday life. This hammock chair features a tearproof selvage created by doubling the weft threads, thus making sure that you will be able to enjoy your peaceful LA SIESTA oasis for many years to come. A multitude of suspension

cords ensures an even distribution of weight. The spreader bar is made of high-quality hardwood from well-managed forests (FSC®). A trademark characteristic of a LA SIESTA hammock chair is its integrated safety swivel, allowing for secure rotation of your hammock chair, thus making it more durable.

Hammock chair basic **Caribeña purple** CIC14-7

Pure Cotton

Pure cotton is a material that is very soft to the touch, comfortable, tearproof and durable. Its long fibres give colours room to shine.

Integrated safety swivel

Another great detail developed and patented by LA SIESTA is the integrated safety swivel for increased safety and comfort. It enables rotation around your own axis without overwinding the suspension ropes.

Tearproof selvage

The two borders of the lying surface feature a particularly tight weave. Thanks to this robust surface, exceptional stability is guaranteed.

High number of suspension cords

Additional comfort thanks to a multitude of suspension cords that distribute the weight equally to the cloth of the hammock and hence give a unique feeling of agravity.

Responsible forestry

The FSC® logo guarantees that the wood used in a product has been produced in compliance with the strict rules of the Forest Stewardship Council from sowing the tree via several processing steps up to the final product. FSC®-Licence Code: C012427
