

Hammock chair basic

## **Modesta** é cru MOC14-1

Hammock chair Basic Modesta écruis made of pure high-quality cotton from organic production (certified according to the OE 100 Standard, Textile Exchange). It is from Colombia, where hammocks have always been an essential part of everyday life. The spreader bar is made of high-quality hardwood

from well-managed forests (FSC®). This hammock chair features a tearproof selvage created by doubling the weft threads, thus making sure that you will be able to enjoy your peaceful LA SIESTA oasis for many years to come. The many suspension cords ensure an even distribution of weight.

LA SIESTA

Hammock chair basic **Modesta écru** MOC14-1

### Cotton from organic production

Fair to human beings, fair to nature: Organic cotton is produced complying with ecological principles. An environmentally friendly alternative to conventional cotton.

### Integrated safety swivel

Another great detail developed and patented by LA SIESTA is the integrated safety swivel for increased safety and comfort. It enables rotation around your own axis without overwinding the suspension ropes.

### Tearproof selvage

The two borders of the lying surface feature a particularly tight weave. Thanks to this robust surface, exceptional stability is guaranteed.

### Unbleached cotton

Unbleached cotton is exceptionally soft to the skin and thanks to less water and energy consumption during production it is also more environmentally friendly. No dyes are used.

### High number of suspension cords

Additional comfort thanks to a multitude of suspension cords that distribute the weight equally to the cloth of the hammock and hence give a unique feeling of agravity.

### Responsible forestry

The FSC® logo guarantees that the wood used in a product has been produced in compliance with the strict rules of the Forest Stewardship Council from sowing the tree via several processing steps up to the final product. FSC®-Licence Code: C012427

### Certified according to OE 100 Standard

This product is manufactured from organic cotton and has been certified in compliance with the criteria of the OE 100 standard. The cotton is not grown from genetically engineered seeds and was cultivated without using chemicals.
